

## Vertebrate Animals

Required for all research involving vertebrate animals  
(IACUC approval required)

**Vertebrate animals include amphibians, reptiles, mammals, birds, and some fish.**

Student's Name(s) \_\_\_\_\_

Title of Project \_\_\_\_\_

Title and Protocol Number of IACUC Approval \_\_\_\_\_

To be completed by Qualified Scientist

1. Species of animals used: \_\_\_\_\_

2. Describe, in detail, the role of the student and the investigator involved, oversight provided and signed by the qualified scientist.

**Form 5B is required for all vertebrate animal projects conducted at a Regulated Research Institution (RRI). The establishment's Institutional Animal Care and Use Committee (IACUC) must review the project, complete the form and hand-sign. Additionally, a copy of the RRI's IACUC Approval must also be included.**

**All Form 5B fields must be completed.**

Information obtained from the qualified scientist, and the results of the investigation.

4. Does the student's project also involve the use of tissues?

- No
- Yes, Be sure to complete Forms 6A and 6B

5. What laboratory training, including dates, was provided to the student?

6. Attach a copy of the Regulated Research Institution's Institutional Animal Care and Use Committee (IACUC) Approval. If the Principal Investigator is not a Qualified Scientist, Form 2 (Qualified Scientist Form) is required.

**Because vertebrate animal projects conducted at a Regulated Research Institution must be conducted under the supervision of a Qualified Scientist/Principal Investigator, Form 2 (Qualified Scientist Form) is required.**
